

## Mia J. Tegner Memorial Research Grants in Marine Environmental History and Historical Marine Ecology

**Application Deadline: June 25<sup>th</sup>, 2010**

Marine Conservation Biology Institute (MCBI) is pleased to announce the 2010 Mia J. Tegner Memorial Research Grants Program in Marine Environmental History and Historical Marine Ecology. Initiated in 2001, this program supports research documenting historical ocean conditions prior to large-scale human impacts.

This program honors the late Dr. Mia J. Tegner, an esteemed marine biologist at Scripps Institution of Oceanography who conducted seminal work in the field of historical marine ecology. Through her studies of long-term changes in abalone populations and kelp forest communities, Dr. Tegner demonstrated the importance and utility of developing ecological baselines for our oceans. Dr. Tegner's work was shortened prematurely after her untimely death in 2001, while diving off the coast of California.

This year's program is made possible through a generous grant from Holland America Line.

### Research Grants Program

**Goal** - To fund studies that develop ecological baselines for our oceans, and help policymakers and conservationists better conserve and restore marine biodiversity.

**Scope**- The program supports natural and social scientists seeking to uncover interactions between natural and human history in marine and estuarine environments worldwide. MCBI is particularly interested in studies describing systems prior to large-scale human impacts and industrialization. Research may draw on sources ranging from culturally- and geographically-derived information, to biological and physical data. Examples of possible information resources include fishery data, letters, journals, interviews, oral histories, historical documents, maps, photos, field surveys, etc. MCBI looks to support projects where our funding can significantly contribute to a key phase or project outcome.

**Programmatic Focus** – MCBI seeks novel proposals that study, document, and describe historical marine ecology throughout the world. We particularly encourage projects related to:

- Pacific Remote Islands Marine National Monument;
- The High Seas, which are those areas outside of nation's jurisdictions;
- Holland America Cruise destinations in Alaska, Caribbean, and Europe;
- Deep and shallow water coral ecosystems; and
- The historical impacts of fishing on marine populations and ecosystems.

**Eligibility-** MCBI invites individuals and collaborative teams from both US and international academic institutions and non-governmental organizations to apply. Preference will be given to graduate students, post-graduate researchers, and early career scientists. For more information contact Elizabeth Rauer ([Elizabeth.Rauer@mcbi.org](mailto:Elizabeth.Rauer@mcbi.org)) or visit [www.mcbi.org/what/tegneroverview.html](http://www.mcbi.org/what/tegneroverview.html).

**Eligible Expenses and Limitations** – Individual proposals with budgets up to \$10,000 (USD) are welcomed. Acceptable funding requests include computing costs, equipment purchases, page charges, supplies, materials, salaries, consulting fees, travel expenses to conduct research, and expenses for residing at research sites. Funds from this program **cannot** be used for administrative overhead, capital expenditures, general funding and conference travel.

**Application Guidelines-** The deadline for submission is **June 25<sup>th</sup>, 2010**. Grant decisions will be made by early September.

To apply, please include:

1. A concise project description, including a justification for the proposed project, a summary of proposed methodology, expected impacts, and the project's relevance to marine conservation (**2 pages maximum**).
2. Supporting documentation, which should include:
  - A one-page budget (with justification for expenses and details regarding additional funding sources, if any);
  - An estimated timeline;
  - A list of project collaborators and their affiliations;
  - A curriculum vita for the principal investigator;
  - A letter of support from a primary academic advisor if the applicant is a student or postdoctoral researcher;
  - Contact information for at least one referee or reference.

Applicants should e-mail all proposal materials by 11:59 p.m. PDT on June 25<sup>th</sup>, 2010 to [tegnerawards@mcbi.org](mailto:tegnerawards@mcbi.org). PDF documents are preferred, but MS Word and Excel documents are acceptable.
